ROAD CROSSER

USER MANUAL

BY: BALKARAN SAMRA & PAVNEET GILL

File Contents

Introduction

Road Crosser is a simple game inspired by games like Frogger & Crossy Road. It is an endless arcade hopper where your only goal is to try to get the highest score possible. You gain points for progressing up the map, however on your way up you must avoid traffic. While you try to top the highscores list, you can also purchase characters with coins and collect rewards from achievements.

Logging In

Each user must create their own account. If you are a first time user, create an account. You must create a unique username and a password that is at least 3 characters long. Once you have an account, you can login using that username & password combination in the future. Your account is important as it stores all your highscores, coins, characters, & achievements.

Note: Usernames are not case-sensitive, however passwords are.

Controls

W / UP Arrow - one hop upward.

A / LEFT Arrow - one hop left.

S / DOWN Arrow - one hop down.

D / RIGHT Arrow - on hop right.

Gameplay

You will spawn on a row of grass at the bottom of the map, from here you must make your way to the grass at the top of the map. Each time you move towards the top of the map, you will score a point. Once you do get to the top, you will be reset back down to the bottom, and a new map will be generated. However, your score will continue to go up, until the game is over.

As you try to get your highscore, there will be a couple of challenges you must overcome. The first being the traffic. There will be 5 lanes of traffic for which the order and speed will be randomly generated. You cannot touch any of the traffic at all. If you do collide with any vehicle the game will end. The second obstacle will be the timer. Every time a fresh map is generated the timer at the top of the screen resets to 15 seconds. If you do not reach the top of the map before the timer runs out, the game is over.

Each time the map is generated, 3 coins will be randomly placed throughout. It is optional to pickup these coins, however they will allow you to unlock new characters!

Characters

Road Crosser features 19 unique characters to play as. Each character can be purchased from the characters menu. The characters menu can be accessed by click the "Characters" button on the main menu screen. Each character costs 100 coins to purchase, and will stay unlocked after purchase. You can select which unlocked character you want to play as by navigating to that character and clicking the "Select" button.

Achievements

Road Crosser features 6 achievements. To view the available achievements & progress, click the "Achievements" button on the main menu. On the achievements menu you can view all the achievements, collect rewards, and track your progress. On the bottom right corner of each achievement tile, there is a button. There are multiple states this button can be in, each state represents a different level of progress.

Achievement Button States

Grayed Out - you have yet to complete this achievement.

Orange - you have completed this achievement. Click to collect your reward.

Green - you have already collected the reward from this achievement.

Highscores

You can view all the highscores by clicking the "Highscores" button on the main menu. The highscores page will display the highest scores achieved by all users. You can sort them by score or name by simply clicking on the headings at the top of each column. If you wish to search for a specific user, simply type the username you want into the search bar (clear the search bar to bring full list back).
